ELI DANIEL ISRAEL MONTEROSO

Software Engineer

Baybay City, Leyte, Philippines | 09398158668 | monteroso.eli@gmail.com linkedin.com/in/eli-monteroso-4ba49a292 | github.com/EliiDaniel

PROFESSIONAL SUMMARY

Software Engineer with professional experience in C++, web development, software maintenance, and live production environments. Background spans live MMORPG feature development, university systems support, and full-stack web applications. Experienced in developing new features, resolving software defects, supporting deployments, maintaining technical documentation, and collaborating with international teams. Proficient in object-oriented programming, version control systems, and modern software development workflows. Adaptable, quick to learn new technologies, and committed to delivering reliable, scalable software solutions.

PROFESSIONAL EXPERIENCE

Software Engineer | Gamigo PH *May 2025 – Present*

- Develop and maintain features for a live MMORPG game using C++, ActionScript, and the Gamebryo Engine, including new functionality, content updates, and system enhancements.
- Investigate, debug, and resolve software defects across gameplay, UI, and supporting systems.
- Design and maintain UI components in Adobe Flash, and integrate in-game content such as cosmetics, mounts, items, and events.
- Support deployments via Jenkins, manage source control with Perforce and Bitbucket, and track tasks and bug reports in Jira.
- Collaborate with international developers, QA engineers, designers, and producers, maintaining technical documentation and release notes in Confluence.

Computer Programmer I | Visayas State University *June 2024 – May 2025*

Baybay City, Leyte, Philippines

- Performed system maintenance, troubleshooting, and updates for software systems used by university departments and administrative offices.
- Addressed technical issues and implemented improvements tailored to organizational needs, ensuring reliability and continuity of internal systems.

Software Developer (Part-Time) | Bootyard Technologies *Aug 2023 – Nov 2023*

Ormoc City, Leyte, Philippines

- Implemented new application features, resolved software defects, and developed push and email notification functionality.
- Worked with data exports, backend business processes, and background jobs (Sidekiq) across development, staging, and production environments.
- Collaborated using GitHub and maintained project documentation.

Software Development Intern | Bootyard Technologies *May 2023 – Aug 2023*

Ormoc City, Leyte, Philippines

- Developed and maintained features using Ruby on Rails, Bootstrap, and Stimulus.js, including reading and modifying legacy codebases.
- Assisted with debugging, testing, and technical documentation, collaborating via GitHub and participating in project planning.

TECHNICAL SKILLS

Programming Languages: C++, C#, Java, Python, Ruby, PHP, JavaScript, C, ActionScript

Software Engineering: Object-Oriented Programming, Software Maintenance, Feature Development, Bug Investigation & Resolution, Technical Documentation, Release Management, Agile Development, API Integration

Tools & Platforms: Git, GitHub, Bitbucket, Perforce, Jenkins, Jira, Confluence, MySQL

Web Technologies: HTML, CSS, Laravel, Ruby on Rails, Livewire, Alpine.js, Stimulus.js, Vue.js, jQuery, Tailwind CSS, Bootstrap

Additional Technologies: Gamebryo Engine, Adobe Flash, Relational Databases, Android (Mobile Development)

Professional Skills: Problem Solving, Teamwork, Time Management, Cross-Team Collaboration

EDUCATION

Bachelor of Science in Computer Science *2018 – 2024*
Visayas State University, Baybay City, Leyte, Philippines

PROJECTS

Progressive Web Application Document Requisition and Appointment Booking System (Thesis), 2023 – 2024

- Full Stack Developer for the Office of the University Registrar's document requisition and appointment booking system.
- Built using Laravel, Livewire, Alpine.js, Tailwind CSS, and third-party API integrations.

Appointment Booking System, 03/2024 – 05/2024

- Developed with Laravel, PHP, Livewire, Alpine.js, and Tailwind CSS.
- Integrated APIs and external packages to support booking workflows.

Point of Sale and Inventory System, 01/2024 – 02/2024

- Built using Laravel, Livewire, and Alpine.js.

E-Closet, 04/2021 – 05/2021

- Database application project.

E-Convert, 04/2020 – 05/2020

- Android mobile application development project.

Snake and PokeJump, 03/2019 – 05/2019

- Java-based object-oriented programming projects.

CERTIFICATIONS

- Getting Grounded on Analytics (2020)

LANGUAGES

- English — Full Professional Proficiency
- Filipino/Tagalog — Full Professional Proficiency
- Bisaya/Cebuano — Native Proficiency
